SUMMARY

I am a passionate, growth-minded engineer with experience in both early-stage startups and established companies. I am skilled in front- and back-end development, product ownership, and breaking down complex technical problems. I'm looking for a position as a full-stack engineer in a fast-growing company where I can expand my technical skills and leverage my public speaking and communication skills.

TECHNICAL SKILLS/TOOLS

HTML, CSS/SASS, Vanilla JS, Node.js, React, Bootstrap, SQL, MongoDB, Express, Git, Mocha/Chai, AWS, Postman, NPM/Yarn, Github, Visual Studio Code, Slack, GSuite

EDUCATION

Kenzie Academy - *Graduate Certificate*

October 2021

Full-Stack Engineering Certificate (MERN)

Purdue University Global - *Bachelor's*

November 2020

Business Administration and Management - GPA: 3.9

TECHNICAL EXPERIENCE

Kibbles & Ritz - *full-stack MERN travel application*

Kibbles & Ritz is a project designed for people who love to travel with their pets. Featuring personal profiles, favorites lists, and a Google Places integration, users can search for pet-friendly businesses on a live-updated map and filter by pet type and size. Users can save their favorites, see details and user reviews, and even submit their own reviews about their pet-friendly experiences. I acted as a developer and the design lead for this project as I came up with the concept for the group.

TECHNOLOGIES USED: HTML, SASS, Google Places API, Bootstrap, React, Node.js, Express, MongoDB, Mongoose, Postman, Mocha, Heroku

Portfolio Website

- Designed and coded a front end website that showcases different projects

TECHNOLOGIES USED: HTML, CSS, Bootstrap, React, Node.js, email-js,Heroku

Connect 4 - *Group Project*

- Group project in which I took the Product Owner role as well as contributing a substantial amount of code

TECHNOLOGIES USED: HTML, CSS, Javascript

EXPERIENCE

SEPHORA - *Operations Consultant (Part-Time)*

Jan 2021 - Current

- Participates in inventory control measures and loss prevention programs to reduce shortage and meet company shrink goals within a 0.2% margin.
- Constructs and updates brand displays regularly to ensure the new product is available for customers to contribute to monthly sales goals
- Maintains confidentiality around proprietary launch materials to ensure data integrity

Platform Science - *Recruiter*

JUNE 2019 - NOV 2020

- Owned full-cycle recruitment process (sourcing through close) for all engineering, design, and product roles for a SaaS startup and was directly responsible for growth from 60 employees to over 150 in a year.
- Used analytics to attract key and diverse talent for searches and reported on those metrics to the CEO, board members, and executives.
- Collaborated and built relationships with hiring managers and teams to deeply understand their hiring needs and the technical requirements for a role
- Built processes that will help the recruitment team scale its efforts for years to come - many of which are still in use today.

Club Z! In-Home Tutoring Services - *Talent Acquisition Specialist (Contract)*

AUG 2018 - MAY 2019

- Recruited appropriate candidates remotely for over 300+ franchises nationwide Interview job applicants to facilitate the growth of the company and its franchisees
- Managed candidates through the selection process & provided candidate care, acting as candidate advocate to offer management including reference checks, salary recommendations, offer letter generation, and negotiated offers in order to ensure an efficient hiring process and good candidate fit.
